

## **ABSTRACT OF THE DISCLOSURE**

2 A trimmer wheeled accessory for a gas or electric powered line trimmer used to  
3 support the distal end of the trimmer pole during operation. The accessory includes an  
4 extension arm that is longitudinally aligned with the trimmer main pole and selectively  
5 attached thereto via clamps. The distal end of the extension arm extends from the trimmer  
6 head. Attached to the distal end of the extension arm is a wheel assembly that supports and  
7 allows the distal end of the extension arm to roll on the ground or grass when cutting grass or  
8 weeds. The extension arm is sufficient in length so that the wheel accessory is located in front  
9 of the trimmer head. The extension arm may be rotated around the trimmer main pole so that  
10 the wheel assembly supports the trimmer head in both a horizontal or vertical alignment.
